## Tariff concerns fueling El Paso region's economic growth

By Alfredo Vasquez  
*Special to the Courier*

EL PASO COUNTY – Although industrial parks in the El Paso region are composed mostly of warehouses and distribution centers to serve factories in Ciudad Juárez and other areas of Mexico, a gradual shift seems to be in play due to the new tariff policies imposed by the federal government.

For example, Faith Technologies Inc. (FTI), an electrical and energy services company, plans to establish operations in a new 500,000 square-foot manufacturing facility at the Pellicano Industrial Park. The \$81.6 million project is expected to create 200 jobs and is scheduled to begin by summer 2026.

FTI specializes in engineering, construction, manufacturing, and clean energy. The company provides electrical services, including planning, design, and installation, according to its website.

In a recent report, David Jahner, executive vice president of FTI, stated that being a part of the El Paso community is an exciting new chapter for the company. "As we grow, we're proud to do so with our uncompromising focus on safety and our culture of care, which is our commitment to supporting our team members' well-being and creating a workplace where people feel valued, respected and empowered. We look forward to building strong connections and making a positive impact in El Paso," Jahner commented.

To support the project, El Paso County Commissioners Court approved a Chapter 381 Agreement that provides a tax rebate for a portion of the development's capital investment.

Commissioners approved providing the company property-tax grant payments totaling \$958,988 over 10 years for the project if all requirements are met. That includes creating 200 full-time jobs within three years of completion of the factory, with pay at least equal to the county median wage of \$18.21 per hour. FTI officials stated that they

plan to pay 180 hourly workers \$40 per hour and twenty salaried employees will receive an average of \$110,000 per year.

"FTI's expansion is a major boost for economic development in the Borderplex region, creating

# Virginia's clownish redistricting scheme

Virginia is the new Illinois. The practice of drawing partisan districts is named after Elbridge Gerry, the 19th-century Massachusetts governor. Even he might blush at the extreme gerrymander that Democrats in the commonwealth are pushing.

They want to go from a congressional delegation with 6 Democrats and 5 Republicans – broadly representing the partisan makeup of the state – to a 10-1 Democratic advantage.

In other words, purplish Virginia would have a congressional delegation that, in percentage terms, would be more Democratic than that of Illinois; Virginia's delegation would be 90% Democratic, the Land of Lincoln's a mere 82%.

Another way to look at it is that Virginia would be almost as purely Democratic as Massachusetts, which has a 9-0 split. Virginia is reliably Democratic

in presidential elections (Kamala Harris won 51% of the vote), but it isn't Vermont (where Harris won nearly 64%) or California (58.5%).

Prior to this year and the inauguration of new statewide officials, Virginia had a Republican governor, a Republican lieutenant governor and a Republican attorney general. The GOP held a majority in the state House as of 2023, and today is only a step behind Democrats in the state Senate, 21-19.

Yet, the substantial portion of the statewide electorate – sometimes a majority – that votes Republican will be almost completely shut out of congressional seats. And, of course, this is being done in the name of "democracy."

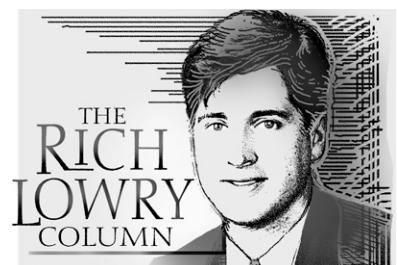

Virginia's move, which still needs to clear hurdles, is a salvo in the mid-decade redistricting wars set off by President Trump and the GOP, beginning

in Texas. It was foolhardy of the GOP to go down this road, but now Democrats in a relatively moderate state are creating a new standard for audacity.

Buoyed by their election victory last year – led at the top of the ticket by Gov. Abigail Spanberger, who is supposed to be a centrist – Democrats have tortured the map to produce the 10 presumptively Democratic seats.

One of their methods is to tap into populous, deep blue Northern Virginia to scoop up heavily Democratic voters, and then draw districts extending into less populated, Republican areas. The idea

## Food for thought By Dr. Glenn Mollette

### Friendship is a two-way street

Friendship is a two-way street. If a relationship is totally dependent on one person it won't last very long.

If you have to make all the effort a friendship will soon die. One person, does not make a friendship, marriage or any kind of relationship.

The telephone works both ways. Text messages and emails work both ways. Telephones are made to make calls but they also receive calls. If you have to make all the calls, make all the effort to connect with someone then you will become tired and give up.

This may be why so many people have so few friends. If you want a friend, be a friend. If you want to be connected to your marriage partner then every day it's up with these people? I don't

have a good answer but I know many of us deal with these personalities.

Often, people are the meanest to close family and friends. A spouse may treat another spouse badly because they believe they can get by with acting so badly. Relatives often do the same thing. People get by with it for a little while but eventually loved ones and friends will begin to pull away. In time, mean people will find

themselves very lonely. You can't treat others badly and get by with it forever. It will come back to you.

Don't waste your life constantly trying to love the people who shrug you off. Move on!

This is not rocket science or brain surgery. Return communication. Don't act like you are King Tut and are too important to make phone calls. Visit with others and respond to messages, texts, etc. Reach out to others and show yourself friendly.

Of course, there is a chance that you love being in isolation and prefer to just stare at the walls or television. You have the right to make that choice, as long as you don't mind living with that choice.

**NEW JOBS, EH** – GreenPower Motor Co., a Canadian-based enterprise, will soon move its operations to an expansive facility, above, in the Gateway Rail Park, which is located in Santa Teresa, NM.

## Growth

From Page 1

200 high-quality jobs and strengthening our position as a hub for advanced manufacturing and innovation,” noted Jon Barela, CEO of The Borderplex Alliance.

Another company that is moving to the El Paso region is Green Point Development, which is spearheading a project, termed Sky Park. The new complex will cover 200 acres near the El Paso International Airport.

The Sky Park project is a public-private partnership that will be built in four phases, according to company officials. Plans are to turn the city-owned land into a hub for logistics, manufacturing, and innovation.

Sky Park’s first phase will have two buildings with a combined total of just over 636,000 square feet of space, and will cost about \$65 million to construct, project developer David Karr stated during a

recent groundbreaking event. These buildings are expected to be completed this summer.

Eventually, Sky Park is expected to deliver more than 3 million square feet of industrial space on airport property and add about 2,100 direct jobs to the local economy. The entire four-phase industrial park will cost about \$350 million to \$400 million to build, according to Karr.

Tony Nevarez, the airport’s aviation director, said that these leases for development on airport land help the airport fund improvements, expand services, and remain financially resilient.

A third project is GreenPower Motor Company’s plans to build a factory in the border region to create electric school buses. Company officials stated that it will locate its operations in the Santa Teresa industrial park, which is adjacent to El Paso County’s westernmost boundary.

The Canada-based

company plans to move its U.S. headquarters to Santa Teresa’s Gateway Rail Park. The factory will be in a new, 135,000 square-foot building that GreenPower will lease from Grupo Abyacs, a local development and construction company. GreenPower officials stated that they expect to begin operating in June and hire about 100 employees with plans to expand the workforce to 340 employees within 10 years.

For years El Paso-area economic developers have been trying to get a motor vehicle factory to locate here, noted Jerry Pacheco, Border Industrial Association president, who helped recruit GreenPower to Santa Teresa. He related that this region has a lot of automotive components’ manufacturers and distributors, especially across the U.S.-Mexico border in Juárez, but no factory that builds an entire motor vehicle.

“It’s unprecedented. We are going to see a bus built

from the frame all the way to completion, seeing it roll off the ramp at the factory,” Pacheco exclaimed. He added that jobs will pay an average annual salary of \$46,000, that’s about \$22 per hour.

Pacheco pointed out that because of this area’s Foreign Trade Zone designation, GreenPower will be able to

postpone paying tariffs, and in some cases lower tariffs to help the company’s cash flow.

Apparently, in spite of tariff uncertainties, El Paso’s economy will continue to grow because of its vast industrial park opportunities and its ties to the manufacturing sector in Mexico.

## Moments in time

THE HISTORY CHANNEL

• On Feb. 20, 1977, an episode of the TV sitcom “Seinfeld” titled “The Pothole” debuted, with the inclusion of a storyline in which the eccentric character Kramer adopted a stretch of the fictional Arthur Burhardt Expressway via the real-life Adopt-A-Highway program.

• On Feb. 21, 2016, quadruple amputee Kyle Maynard reached the summit of Mount Aconcagua, South America’s tallest mountain, after bear-crawling up the nearly 23,000-foot peak without the use of his prosthetics. Four years earlier, he’d climbed Africa’s Mount Kilimanjaro in the same manner.

• On Feb. 17, 1972, the 15,007,034th Volkswagen Beetle rolled off the assembly line and broke a world car-production record held for more than 40 years by the Ford Motor Company’s Model T, which was manufactured from 1908 to 1927.

• On Feb. 18, 1930, Elm Farm Ollie earned the remarkable distinction of becoming the first cow to fly – and be milked – in an airplane. Her milk was then boxed and parachuted to waiting spectators on the ground.

• On Feb. 19, 1473, Nicolaus Copernicus, regarded as the father of modern astronomy, was born in Torun, a city in north-central Poland on the Vistula River. He would become the first modern

# The NBA is about to start its race toward the playoffs

By Steve Escajeda  
Special to the Courier

This past weekend the NBA reached its unofficial midway point of the season. I say "unofficial" because with an 82-game schedule, the halfway point should be when all the teams have played around 41 games.

Well, almost all the NBA teams have played at least 55 games, but since they just had All-Star weekend and the league did take a week off, many see this time as the start of the second half of the season.

And now that the NBA has gotten all that meaningless all-star stuff out of the way, things will get real serious, real fast, as the teams are down to the last 25 games of the regular season.

With that long explanation out of the way, let's focus on where the league is, and which teams seem poised to make the playoffs and maybe win a championship.

Let's look at the NBA's Eastern Conference.

A young team that has been on the rise in the last couple years has finally reached the top of the league.

The Detroit Pistons have the best record in the NBA at 40-13.

How amazing is that?

It was just two years ago that the lowly Pistons set the all-time league losing streak, dropping 27 games in a row. They finished with an NBA worst record of 14-68.

But with the play of emerging superstar Cade Cunningham and big man Jalen Duren, the Pistons improved to 44-38 a year ago and now are a real-life contender for an NBA title.

There are a couple superstar players who are missing the entire season,

which everyone knew would affect their teams and the shape of the Eastern Conference.

The Boston Celtics' Jayson Tatum and the Indiana Pacers' Tyrese Haliburton are missing the whole season, but only one of the two teams has been affected negatively.

With Tatum out for the season, along with losing Kristaps Porzingis, Al Horford, Jrue Holiday and Luke Kornet by either trade or free agency, the Celtics were expected to go through a complete free fall and finish at the bottom of the standings.

But that has not been the case, amazingly, the Celtics are second in the conference with a 35-19 record. The play of Jaylen Brown, Derrick White and sharpshooter Payton Pritchard, has the team at the same spot they were a year ago.

The loss to Haliburton, however, has been devastating for the Pacers, as Indiana, who was 50-32 last season, is just 15-40 and out of the playoff run.

The two other teams that appear to be in the Eastern title race are the New York Knicks and the Cleveland Cavaliers.

Both are veteran teams with a world of talent. The Knicks have Jalen Brunson and Karl-Anthony Towns, while the Cavs have Donovan Mitchell and recently acquired James Harden.

The Western Conference also has four teams that appear to be the top of the crop.

The best team is the same team that won the title a year ago, the Oklahoma City Thunder.

The Thunder have the reigning MVP in Shai Gilgeous-Alexander (SGA for short), and a cast of guys who play their roles perfectly.

After starting the season 24-1, the Thunder looked like they were going to run away with everything again this season, but OKC has gone a mediocre 18-13 since then and only have a three-game lead over the scariest young team in the league, the

San Antonio Spurs.

No, this is not the Tim Duncan-Tony Parker-Manu Ginobili-Greg Popovich Spurs. This is the Victor Wembanyama-and the rest of the guys Spurs, who look like a real threat to the Thunder, especially after beating them four-out-of-five times this year.

The other two teams that could contend are the Denver Nuggets (Nikola Jokic and Jamal Murray) and the Houston Rockets (Kevin Durant and Alperen Sengun).

There are a few more teams that are good, but not that good, like the Toronto Raptors, Los Angeles Lakers, Minnesota T-Wolves and the Phoenix Suns.

But I truly believe that the NBA's final four will have the Pistons and the Knicks fighting it out in the East and the Thunder and Spurs starting a long-time rivalry in the West.

Who is going to win it all?

We'll talk about that at playoff time at the end of May.

## Senior moment

By Matilda Charles

### Courses on AARP

Are you a member of AARP? Even with the recent price increase (from \$15 to \$20 per year), there is still a lot to recommend it.

The AARP Skills Builder for Work section is a valuable benefit, even if we're not still working, because the skills can be helpful to us now for our cognitive health, memory and task focusing. To develop the courses, AARP has partnered with MindEdge Learning, an online company that provides professional development and higher education classes. MindEdge was created by Harvard and MIT for interactive, self-paced learning. There are even credits and certificates for completion.

It was the Communication section of the MindEdge website that caught my eye, and I zeroed in on Advanced Grammar. The MindEdge Studio section looks fun as well, with an introduction to drawing course. Start by looking at AARP's Skills Builder page ([www.aarp.org/work/skills-builder](http://www.aarp.org/work/skills-builder)), or see [mindedge.com/course-catalog](http://mindedge.com/course-catalog)

for the available courses.

There's more to AARP's course offerings, however. Put "courses" in the search box of the main site ([www.aarp.org](http://www.aarp.org)). Right at the top of the page are courses for defensive driving for older drivers and the online smart driver course. (Ask your insurance agent if this course could get you a discount on your insurance premium.) Use the dropdown menu to narrow your selections.

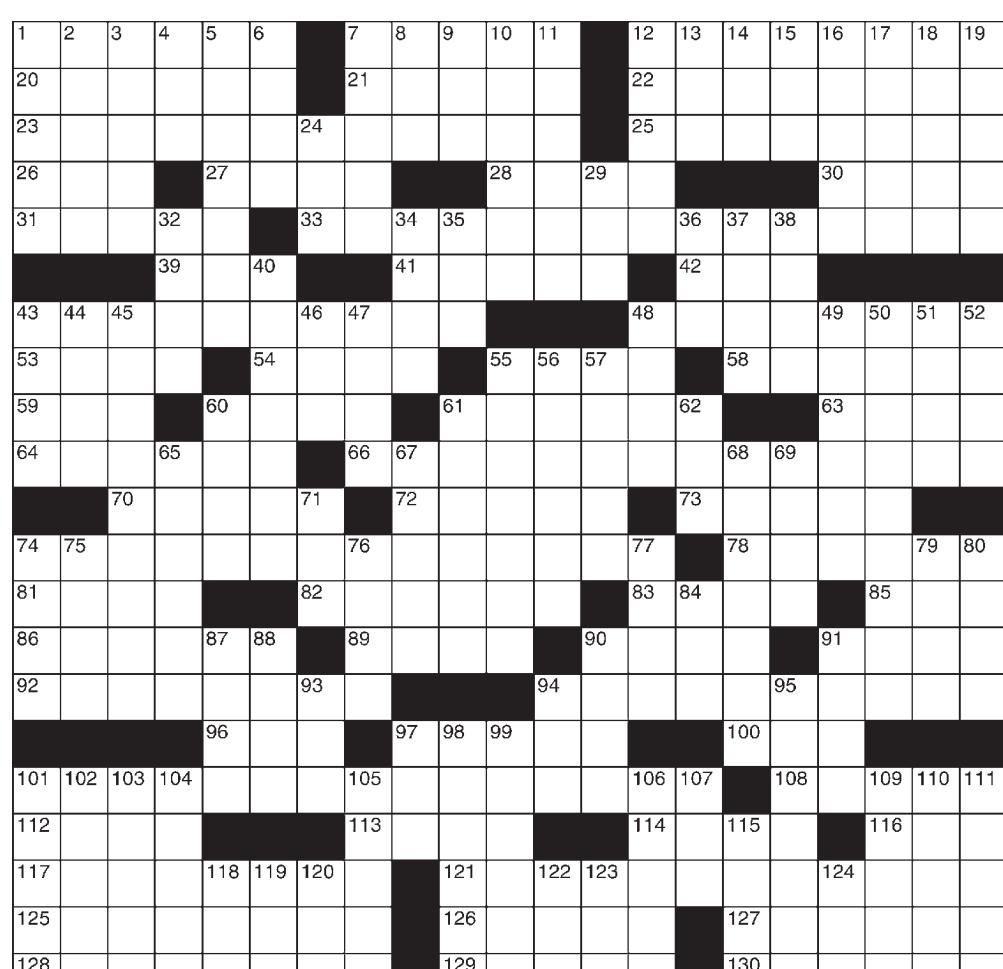

If what you really want is online games, AARP has those, too. Remember FreeCell Solitaire, the game that came installed on the first computer we ever owned? It's on the AARP games page. (There is also Classic Solitaire for the purists among us.)

The Games Center has arcade games, daily crossword, word games and a special section for members only. If you want a real mind-stretcher, look for the 10 x 10 game.

To save on the cost of an AARP membership, consider signing up for three years for \$55, which saves you a few dollars.

is that the Northern Virginia contingent will overwhelm the more rural voters, ensuring that they have little chance of electing a member of Congress who reflects their priorities.

In this sense, the map is not just a partisan power play, but a means of giving Northern Virginia hugely disproportionate sway over the state's congressional delegation.

One district will reach from the inner suburb of Arlington, Virginia, all the way down to York County in the Tidewater area of Virginia, a roughly three-hour drive. For all that these areas have in common, the district might as well stretch all the way to Erie, Pennsylvania. To try to force through their map, Virginia Democrats need to maneuver around a constitutional amendment passed by voters in 2020 to create a nonpartisan districting commission, exactly to avoid the kind of outrage Democrats are now proposing. The amendment passed with 66% of the vote, a strong message from the public that it didn't want gerrymandered

districts.

Democrats have now blown past procedural requirements for re-amending the Constitution to allow for their plan, and may yet get blocked by the state's Supreme Court. The measure also has to pass in a referendum, and there's a chance voters will reject it, although Democrats have scheduled the vote for April, when turnout is low.

None of this is worthy of a state with one of the finest political traditions in America. Virginia Democrats tell themselves they are just responding to Texas, but Democratic states like Illinois and California were already heavily gerrymandered prior to the Lone Star state redrawing its map, and Virginia is going above and beyond in its rank partisan grubbiness.

Democratic state senator Louise Lucas crowed after Democrats produced their maps, "We said 10-1, and we meant it." Yes, indeed, they are determined to protect democracy — Virginia voters be damned.

## Vaccines: Same day or arm is up to preference

DEAR DR. ROACH: I have notes from friends at home who are getting their COVID vaccines and high-dose flu shots on the same day in the same arm. They talk about being completely wiped out and the cons of having two sore arms. Does it matter if you get the shots in one arm or the other? I suspect that it's fine to do them both in one arm, and there's no advantage to dividing it over time or by arm. — N.W.

Recent studies seem to suggest that getting the COVID-19 vaccine in the same arm as previous vaccines leads to higher short-term vaccine effectiveness; however, another recent study shows that getting a subsequent COVID-19 vaccine in the opposite arm leads to higher antibody levels, which are also longer-lasting.

I suspect that there is no major difference whether you consistently get the vaccine in the same arm or not. Personally, I always get my COVID vaccine in my nondominant arm, but I have colleagues who prefer the vaccine in their dominant arm (as they are convinced that moving more means a faster resolution to a sore arm, which is very common after any vaccine).

Getting both your COVID and flu vaccines at the same time is convenient for people who have trouble getting to their provider or when there is no pharmacy near them that provides the vaccine. It's most efficient to get both done at the same time, but when I have done so, I get one in one arm and one in the other. Again, it's a personal preference.

DEAR DR. ROACH: I have high blood pressure and a chronic heart condition that is treated with rosuvastatin and clopidogrel. I do not have high cholesterol. Even so, my cardiologist strongly recommends that I continue rosuvastatin as a precautionary measure. Does this make sense? — T.L.

The goal of rosuvastatin and other statin drugs is to reduce the risk of heart disease complications, including heart attacks, strokes and death. Not everybody who gets these complications will have high cholesterol.

They might have other risk factors such as the high blood pressure you have, or they might have diabetes or less-common lipid issues like a high Lp(a). A high Lp(a) is a risk factor that is not always looked for, but it is important in a person with known heart disease or in those who have a strong family history despite having no traditional risk factors.

In a person who is at a higher risk despite normal or even desirable cholesterol levels (especially a person with known blockages in their arteries), the benefits of treatment outweigh the risks for nearly everyone. There are several calculators your doctor can go over with you to estimate your risk — with and without medicines like rosuvastatin.

It's critical to remember that statin drugs (and other medications that we traditionally call "cholesterol medicines") are effective in people who are at a high risk even if their cholesterol levels are normal.

You are on clopidogrel (Plavix), which is given to people to prevent blood clots, especially people who are at a high risk such as those with a stent or a history of a stroke. This suggests to me that your doctor thinks you are at a high risk, so the use of a potent statin like rosuvastatin is appropriate in this case.

Dr. Roach regrets that he is unable to answer individual questions, but will incorporate them in the column whenever possible. Readers may email questions to [ToYourGoodHealth@med.cornell.edu](mailto:ToYourGoodHealth@med.cornell.edu). ©2026 North America Synd., Inc. All Rights Reserved.

## Using your GI Bill education benefits

### VETERANS POST

by Freddy Groves

GI Bill education benefits come with several forms of help, including a monthly housing allowance (MHA). To be eligible for a full-time allowance, you need to be enrolled in a full-time slate of classes that equal 12 credits. But it's not quite that simple.

The actual amount of money you receive for the MHA depends partially on where you live (more if the area has a high cost of living) and partially on how you attend those classes. If you're taking all of your full-time classes online, did you know that you can increase your housing allowance by taking at least one in-person class? That one class changes your MHA category to in-person, getting you more benefit money, nearly double the rate you would get for only attending classes online. If all of your classes are online, your

monthly housing allowance will be approximately half of the national average, which is quite a deduction.

To find a school that qualifies for you to receive benefits, go to [www.va.gov/education/gi-bill-comparison-tool](http://www.va.gov/education/gi-bill-comparison-tool). Be certain your school qualifies; the January 2026 file of GI Bill Quick Facts indicates there are over 600 suspended institutions. Ask at the school about what they call "hybrid" classes, the combination of online and in-person classes, and if they're allowed.

Many of your questions about your education benefits can be answered at [www.va.gov/education/about-gi-bill-benefits/how-to-use-benefits](http://www.va.gov/education/about-gi-bill-benefits/how-to-use-benefits). When it's time to apply, you can do that online at [www.va.gov/education/how-to-apply](http://www.va.gov/education/how-to-apply). Start at the top of the page with the eligibility information. Note the service periods: 90 days of active duty after Sept. 10, 2001, or 30 days of continuous service after that date, or if you received a Purple Heart after that date.

Be sure to look at the details for the Yellow

Ribbon Program. It covers several expenses the GI Bill doesn't, such as out-of-state or graduate school tuition.

Where there is a desire for education, there is usually a way to make it happen. Call the VA Education Call Center at 888-442-4551 for help.

• "Keep cats indoors during very cold weather. They are particularly vulnerable to freezing. If you can leave the curtains drawn on a window where Kitty can look outside and sunbathe, she probably will be happy." — M.R. in Washington

• This is some good advice given to me by my grandmother if you have lots of outdoor or feral cats in your area: Start your car with a bang — on the hood, that is. When the overnight temperature dips, cats know to find someplace that is wind-shielded and off the ground, and sometimes, that means they will climb up into your engine area to hunker down. If your car starts, they can be hurt or even killed. Give the hood a knock to let a cat know to get out quick.

• Pet paws need extra care in the cold months, especially dogs that must be walked in icy and snowy conditions. Here's a great tip from Y.L. in New York: "I keep a small towel with me on my daily dog walks, but I also wash off my dog's paws with a warm washcloth when we return. Another thing I do is to rub petroleum jelly into her pads once a day. They really take a beating having to go out three times a day in salty, muddy, cold conditions. She won't wear doggie booties, so this works best for us."

• If you keep birds, a reminder: Never preheat pans on high heat, especially nonstick pans. They can let off a chemical that you or I cannot even detect, but can be a health hazard for your bird friend that is in the kitchen area. Don't keep birds in the kitchen when cooking.

Send your tips to Now Here's a Tip, 628 Virginia Drive, Orlando, FL 32803. ©2026 King Features Synd., Inc.

## GO FIGURE!

The idea of Go Figure is to arrive at the figures given at the bottom and right-hand columns of the diagram by following the arithmetic signs in the order they are given (that is, from left to right and top to bottom). Use only the numbers below the diagram to complete its blank squares and use each of the nine numbers only once.

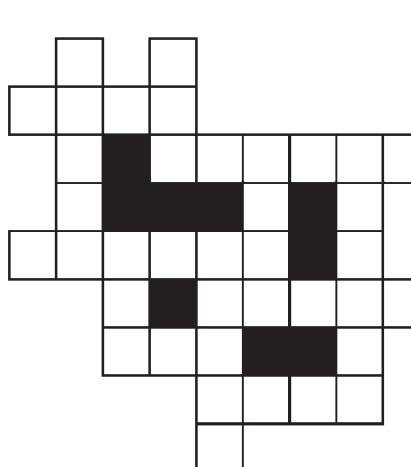

Answer Page 4

Unscramble these twelve letter strings to form each into an ordinary word (ex. HAGNEC becomes CHANGE). Prepare to use only ONE word from any marked ( ♥ ) letter string as each unscrambles into more than one word (ex. ♥RATHE becomes HATER or EARTH or HEART). Fit each string's word either across or down to knot all twelve strings together.
